

ACKNOWLEDGEMENTS

Funding for the Pike River Watershed-Based Plan was provided by the Fund for Lake Michigan, Wisconsin Department of Natural Resources, Wisconsin Coastal Management Grant Program, and Kenosha County.

Susan Greenfield, representing the Root-Pike Watershed Initiative Network, acted as Watershed Coordinator for *Pike River Future* and worked closely with an advisory group of citizens and public officials and Applied Ecological Services, Inc. (AES) to produce the watershed planning document. Other duties performed by the coordinator included consultant contract administration, finance management, and meeting coordination. Lori Artiomow of Hawthorn Hollow Nature Sanctuary and Arboretum and Andy Yench of UW-Cooperative Extension also assisted Pike River Future.

Pike River Future, consisting of representatives from Kenosha, Mount Pleasant, Racine, Somers, Sturtevant, WDNR, conservation groups, local universities, businesses, and residents, played an important role in providing input on watershed goals & objectives, various planning approaches, and input on plan development.

Applied Ecological Services, Inc. (AES) conducted analysis, summarized results, and authored the Pike River Watershed-Based Plan.
